

TRACE BLOCK

SPECIALITY TRACE MINERAL SUPPLEMENT FOR ALL RUMINANTS,
HORSES AND GAME

Contains organic Zinc, Manganese, Copper and Selenium!

KEY FEATURES AND BENEFITS

- Contains 6 essential trace minerals in optimum ratio – improves fertility, growth and health
- Contains only trace minerals – may therefore be used as additional trace mineral supplement together with any other supplement or feed
- Contains Zinc, Manganese, Copper and Selenium in organic form – organic trace minerals are 100% utilised by the animal
- Is 100% weatherproof – may be fed under all types of weather conditions

USES

- Improvement of trace mineral status during the breeding season
- Improvement of trace mineral status during late pregnancy and lactation
- Improvement of trace mineral status of animals maintaining a high level of production
- Prevention of problems associated with low trace mineral status, such as footrot and laminitis
- Improvement of fertility, health, resistance against parasites as well as horn growth of all types of game
- Supplementation of trace minerals to animals not having access to grazing

FEEDING RECOMMENDATIONS

Feed at least once a week at the recommended rates to all ruminants, horses and game together with grazing or roughage freely available. Do not feed indiscriminately together with other trace mineral supplements (oral or injectable) to sheep. Please first consult an animal nutritionist.

RECOMMENDED INTAKES

Type of animal	Recommended daily intake (g/head/day)
